

Abstract

Multimedia delivery methods and multifunction device therefor. Embodiments of the multifunction device may comprise first and second transducers for formatting first and second presentation media, respectively, and computer readable media operatively associated with the multifunction device and having computer readable program code thereon. The computer readable program code may include program code for generating a multimedia presentation from the first and second presentation media for delivery thereof to a network destination from the multifunction device. The computer readable program code may also include program code for separating the multimedia presentation into first and second presentation media for delivery thereof to a user at the multifunction device.
